

# Rigging Thimbles

MODELS: USR-1420, USR-2028, USR-2838

Introducing DuraBrite® Rigging Thimbles: durable and practical rings designed for rigorous everyday use. These high-strength hard-anodized aluminum thimbles are built to last, providing reliable performance in various applications.

Ideal for integration into retrievable false crotches, slings, or custom rigging tools, DuraBrite Rigging Thimbles offer versatility and ease of use. Additionally, they can serve as efficient fairleads and through-deck fittings, suitable for snatch and foot blocks on sailboats.

By utilizing the center hole, these thimbles can replace rigging blocks when running the rigging line through spliced slings or false crotches. This allows for enhanced efficiency without compromising strength or functionality.

## Features & Benefits

- Precision Machined from Aircraft Aluminum
- Smooth Finished for Low Friction
- Hard-Anodized (Type III) Finish
- Wide Flange Edges for Improved Bend Radius

## Ideal For

Arboriculture

Marine

Stage and  
Entertainment  
Rigging

## Specs

### USR-1420

- Dimensions: 20mm x 14mm
- Weight: 4.4 oz.
- MBS 50 kN
- Fits: 1/2" 12-Strand Ropes and 1/2" Double Braid

### USR-2028

- Dimensions: 28mm x 20mm
- Weight: 8.2 oz.
- MBS 80 kN
- Fits: 5/8" 12-Strand Ropes and 5/8" Double Braid

### USR-2838

- Dimensions: 38mm x 28mm
- Weight: 17.6 oz.
- MBS 100 kN
- Fits: 3/4" 12-Strand Ropes and 3/4" Double Braid
